Comprehensive real-time space weather monitoring with solar wind data, X-ray flux charts, aurora forecasting, and NOAA space weather scales. Professional space weather analysis and predictions.

Solar Cycle 25 has roared to life faster than forecasters expected. The sun's strengthening and increasingly tangled magnetic field repels cosmic rays from deep space.

Similarly, space is full of dynamic weather patterns that can have real effects for life on Earth. Space weather refers to conditions in the solar system produced by the Sun's activity. Just as ...

In this guide, we'll break down everything you need to know about solar weather stations--from their purpose and core components to how they work--with insights from RikaSensor, ...

This dashboard provides a snapshot of the current space weather conditions based on the latest products from the SWE Network.

What is space weather ? "Conditions on the Sun and in the solar wind, magnetosphere, ionosphere and thermosphere that can influence the performance and reliability of space-borne and ...

A lot of people come to SpaceWeatherLive to follow the Solar activity or if there is a chance to see the aurora, but with more traffic comes higher costs to keep the servers online.

Solar system, assemblage consisting of the Sun and those bodies orbiting it: 8 planets with more than 400 known planetary satellites; many asteroids, some with their own satellites; comets ...

RGN 4366 has grown into a complex sunspot group. An X1.0 solar flare occurred from Region 4366. Region 4366 produced an M6.6 flare at 01/1002 UTC. SWPC staff will provide specialized decision ...

In Space Weather, persistence and recurrence of active regions on the sun over the 27-day solar rotational

Solar weather system

period play an important role in accurately forecasting the space environment.
