Why is South Korea launching the ESS central contract market auction?

The South Korean government, under the auspices of its carbon neutrality and energy transition goals, has launched the 2025 1st ESS Central Contract Market auction, marking an evolution in the country's battery energy storage system strategy. South Korea has committed to increasing renewable energy capacity while maintaining grid stability.

Is South Korea a BESS supplier?

South Korea is also a major exporter of batteries and energy storage technologies, with Samsung SDI and LG Energy Solution among significant suppliers of products from cells to complete BESS solutions internationally. According to the newest Basic Plan, the country aims to capture a 30% share of the global BESS market by 2036.

Does Equis have a BESS project in Korea?

Equis is successfully leveraging its extensive BESS track record in Korea, having owned and operated a 207MWh peak-shaving BESS project in Incheon and Pohang, the largest in Korea at the time, as well as currently operating a 75MWh solar-connected BESS project in Sinan County.

Why do we need a BESS contract in 2025?

Strengthening the domestic BESS landscape not only supports internal resilience but also serves as a proving ground for exported technologies. The 2025 tender builds on the government's initial foray into centralized BESS contracts, launched in 2023 with a 65MW, 4-hour project on Jeju Island.

South Korea is ramping up its battery energy storage deployment with a new 540MW tender to stabilize the grid and support renewable energy growth. Learn how this move strengthens ...

The consortium formed by Equis, Korea East-West Power, Jeju Energy Corporation, and LG Energy Solution prevailed in the inaugural auction and was awarded the full capacity on offer in the east ...

The Ministry of Trade, Industry and Energy unveiled plans for a nationwide tender to install 540 megawatts of battery energy storage systems (BESS), marking the country's first major ...

South korea off-grid bess cabinet 30kw transaction

The government ministry announced the plan this morning. It aims to procure 540MW of grid-connected battery energy storage system (BESS) technology to help resolve power grid ...

The South Korean government, under the auspices of its carbon neutrality and energy transition goals, has launched the 2025 1st ESS Central Contract Market auction, marking an ...

Results of an auction to procure large-scale energy storage to support the electric grid in South Korea will be announced in February.

South Korea launches 2025 ESS auction offering 540 MW capacity with 15-year contracts. Learn key requirements, selection criteria, and post-award restrictions.

Korea Southern Power Co. announced on the 3rd that it has begun construction of the central contract market-type battery-type cycle BESS (Battery-ESS) for the first time in Korea to ease ...

The South Korea Off Grid Battery Energy Storage System market is undergoing rapid transformation, driven by technological innovation, shifting consumer behaviors, and supportive...

The auction was announced in May, 2025 by the South Korean government, and it is seeking contracts for 540 MW/3,240 MWh of grid scale BESS with a six-hour duration. The ...
