What is a commercial sunroom?

Commercial sunrooms by Solar Innovations provide the strength, durability, and customization options second to none in the industry. Solar's glazed structures can be directly on the ground or atop high rise buildings.

What makes a sunroom a great addition?

Sunrooms are the perfect four-season addition to increase the view and create a focal point for any home or business. Solar Innovations's custom designed structures include durable aluminum framework. They are tailored with the most comprehensive line of aluminum accessories in the industry.

Do sunrooms add value?

Not only do sunrooms expand conditioned living space, they also provide natural light, protection from the elements, and scenic seating areas for dining or simply enjoying nature without having to leave the building. In addition, the addition of a glazed structure adds to the property value.

Where can solar glazed buildings be used?

Solar's glazed structures can be directly on the ground or atop high rise buildings. Restaurants, hospitals, and retirement homes can all benefit from the additional natural light provided by the implementation of a glazed room.

These high-efficiency photovoltaic panels are installed on the glass of the sunroom, maximizing the use of solar resources. Each day, this system can generate approximately 13kWh of electricity, providing ...

Our solar patio covers let you enjoy your outdoor space while harnessing renewable energy, all without major construction. Learn how our Sunroom Systems solar patio cover solutions can transform your ...

Photovoltaic (PV) panels transform sunlight directly into electricity and are among the most popular choices for residential solar installations. They can power electrical devices in the ...

The GoodWe zero-carbon sunroom combines people-oriented design with energy generation, enhancing building adaptability. By integrating photovoltaic technology into the sunroom roof, it offers ...

Sunroom solar outdoor on-site energy solar

Located on a mountaintop adjacent to the Cleveland National Forest and San Pasqual Valley, this rural property is a rebuild from the 2007 wildfires. Out of the ashes arose the opportunity to build a cutting ...

The GoodWe zero-carbon sunroom combines people-oriented design with energy generation, enhancing building adaptability. By integrating photovoltaic ...

Commercial sunrooms by Solar Innovations ® provide the strength, durability, and customization options second to none in the industry. Solar's glazed structures can be directly on the ground or atop high ...

Reduce utility costs, achieve energy independence and meet sustainability goals with renewable on-site solar power-and even sell surplus energy back to the grid.

Ideally, your sunspace should face due south, but 30 degrees east or west of due south will provide about 90% of the maximum static solar collection potential. The optimum orientation will depend on ...

Solar panel sunrooms are starting to appeal to homeowners trying to mix sustainability with design today. Let's investigate how putting solar panels in your sunroom may make the area ...
