As we approach 2025's energy crunch season, Tallinn's storage fleet stands ready to power 63,000 homes through 72-hour outages. Not bad for a city that only started its storage push in 2021.

A recent article published in Renewable and Sustainable Energy Reviews unpacks how energy storage can be strategically integrated into electric rail infrastructure to decrease emissions, cut costs, and ...

Summary: Tallinn's growing expertise in energy storage systems positions it as a key player in Europe's renewable energy transition. This article explores how Estonia's capital drives innovation, meets ...

Tallinn uses graphene-doped anodes that charge faster than a Tesla Supercharger. One pilot site near Lemiste Lake stores enough juice to power 500 homes during peak blackout seasons.

As Europe races toward 2030 renewable targets, the Tallinn Power Storage Project has become a litmus test for grid-scale battery viability in northern climates.

Welcome to Tallinn Power Storage - where historic charm meets cutting-edge battery technology. As Europe races toward renewable energy targets, Estonia's capital has quietly become ...

Built at the Marseille-Fos Port, the marine geothermal power station Thassalia is the first in France, and even in Europe, to use the sea's thermal energy to supply linked buildings with power for heating and ...

The Estonian power grid is steadily building up more resources to accommodate growing demand from smart industries and meet sustainability goals. A new major milestone in this transition has been ...

Evecon, an Estonian renewable energy company, and Corsica Sole, a French company, will build two battery energy storage systems with a total capacity of 200 megawatts in Harju County by 2025.
