Designed to meet the demanding requirements for precise humidity and stability, Advanced engineered design incorporates the latest in cabinet, refrigeration, temperature control and monitoring features.

When it comes to Controlled Room Temperature Cabinets, you can count on Grainger. Supplies and solutions for every industry, plus easy ordering, fast delivery and 24/7 customer support.

PCB Storage Dry Cabinets can store electronic components, like SMD/IC/PCB/chips in the relatively closed dry box to form a low humidity and anti-oxidation environment to prevent moisture related ...

Temperature humidity test chamber performs high low temperature cycling, temperature and humidity alternating tests, to examine how products react to these extreme environmental conditions, ...

Our Australian Made Humiditherm range is specifically designed to meet your needs for reliable and accurate humidity and temperature control.

With its extensive temperature range and precise humidity control, it guarantees that specimens are kept in optimal conditions for accurate testing and analysis. Advanced technology ensures a consistent ...

With extensive experience in the pharmaceutical, chemicals, and electronics industries, we provide climate controlled storage solutions that meet stringent industry guidelines.

We provide robust, reliable dry cabinet solutions engineered for the most demanding applications, ensuring your moisture-sensitive devices (MSDs) are protected and your processes remain ...

They are configured to safely store temperature sensitive chemicals, regardless of the temperature range they require. Whether storing chemicals at 35°F or above 175°F, our air conditioned, ...

Temperature and humidity controlled data center cabinets for chemical plants

Temperature and Humidity Controlled Cabinets are storage units designed to regulate both temperature and humidity levels within a defined space. These cabinets are equipped with advanced sensors and ...
