-----

This article explores how battery storage, pumped hydro, and innovative technologies can transform Tunisia's power infrastructure while addressing challenges like solar intermittency and peak demand ...

Tunisia's Minister of Industry, Mines and Energy, Fatima Al-Thabat Shabb, has approved four solar projects with a combined capacity of 500 MW Battery Energy Storage System (BESS).

Voltalia, an international player in renewable energies, has secured a 132-megawatt solar project in the Gabs region in south-east Tunisia After winning the Sagdoud project in May 2024 (1), ...

solar PV and wind together accounting for nearly 70%. The integration of these variable energy sources into national energy grids will largely depend on storage technologies, and among them especially ...

Voltalia has secured a new 132-megawatt solar project, following the Sagdoud project in May 2024 and the Menzel Habib project in December 2024. This new 132-megawatt solar project, ...

Voltalia's 132-MW Tunisian solar win fast-tracks high-irradiance PV with grid-smart controls and storage-ready design, unlocking bankable finance, local jobs, and a cleaner hedge against gas ...

With the addition of the Wadi project, Voltalia's total solar capacity in Tunisia that is planned to move into the construction phase has reached nearly 400 MW. Furthermore, the project aligns ...

Preliminary studies have confirmed the critical role of storage technologies in supporting Tunisia's ambitious renewable energy targets. The recent launch of the country's first large-scale energy ...

Voltalia selected to build 132-MW Wadi solar plant in southeastern Tunisia Project lifts Voltalia's Tunisia solar pipeline to nearly 400 megawatts Solar push supports Tunisia's strategy to ...
