---

In this paper, we present a solar cooling installation located at the Center of Researches and Energy Technologies (CRTEn), in Bordj-Cédria, Tunisia.

As Tunisia faces rising temperatures and energy costs, solar air conditioners emerge as a game-changing solution. This article explores how solar AC systems work, their economic benefits, and ...

The research develops a prototype system that responds effectively to variable humidity and temperature across Tunisia--from the humid Mediterranean coast to the dry Sahara--and ...

The demand for cooling continues to increase in line with environmental changes and a greater desire for human comfort. In north Africa and middle eastern countries, and particularly in ...

The solar air conditioning system was installed and studied in the Center of Researches and Energy Technologies (CRTEn) at Borj Cedria Techno Park in Tunis the capital of Tunisia.

In this paper, we present a research project aiming at assessing the feasibility of solar-powered absorption cooling technology under Tunisian conditions.

As Tunisia faces rising temperatures and energy costs, solar air conditioners emerge as a game-changing solution. This article explores how solar AC systems work, their economic benefits,

Discover how Tunisia is leveraging solar-powered cooling systems to combat rising temperatures while reducing energy costs. This article explores innovative applications, government incentives, and real ...

In this work, we study the energy performance of a domestic air conditioner operating by a hybrid PV -Grid source tested in the climatic conditions of Tunis (Tunisia).
