What is an IP67 power supply?

Phoenix Contact's IP67 power supplies give engineers flexibility to design applications to meet their specific needs by replacing power supplies located in large, centralized control cabinets with power supplies mounted directly on the machine.

Which power supply has IP67 degree of protection?

Take a look at the TRIO POWER power supply with IP67 degree of protection in the greatest detail. The product can be viewed freely from all angles using the zoom and rotate functions. The robust power supplies with IP67 degree of protection are ideal for installation in the field directly at the load.

Do I need an IP67 enclosure?

IP67 is defined as being completely protected against intrusion from solid objects and protected against the effects of immersion between 15cm and 1m (up to 30 minutes). If your product has the potential to be exposed to liquid ingress such as rainwater or spray cleaning, we advise IP rated enclosure is required.

How do I install the IP67 power supply?

The IP67 power supply can be mounted in any direction without being susceptible to derating. The mounting flanges on the power supply are designed to make installation quick and easy. Local DC and AC OK LEDs on the front of the power supply as well as a DC OK floating signal contact make monitoring input and output power simple and trouble-free.

Located off the northwest corner of Europe, the country includes the island of Great Britain - which contains England, Scotland and Wales - and the northern portion of the island of Ireland. The...
