Will Moro hub build a solar-powered data center in Dubai?

Moro Hub has signed an agreement with Huawei to build a solar-powered data center in Dubai, UAE. The new 100MW facility will be located in the 3,000MW Mohammed bin Rashid Al Maktoum Solar Park outside of Dubai to the southeast of the city. Timelines of construction were not shared.

How sustainable is Dubai solar park?

It has a planned production capacity of 5,000 MW by 2030, with investments totalling D 50 billion. When completed, it will save over 6.5 million tons of carbon emissions annually. The Mohammed bin Rashid Al Maktoum Solar Park contributed to DEWA winning the Best Sustainable Project of the Year in the UAE at the 2014 MEED Quality Awards.

Why is Moro hub partnering with Dubai?

Michael Doersam said: "Our partnership with Moro Hub is a major step for our technology landscape as we gear up for our next era of growth and expansion. Both organisations share a common vision to position Dubai as a global leader in technology, innovation and sustainability.

When will Dubai solar park be fully operational?

The 800MW third phase of the solar park using photovoltaic solar panels became fully operational in 2020. In June 2016, DEWA announced the Abu Dhabi Future Energy Company (Masdar) led consortium as selected bidder for the 800MW third phase of the solar park using photovoltaic solar panels.
