The Blue Rack is the world's first sodium-ion battery cabinet designed for mission-critical applications such as data centers, peak power-shaving, and other industrial power environments.

With excellent performance in low and high temperatures, and lower material costs, it is ideal for stationary applications such as grid peak shaving, commercial backup, and renewable energy ...

A new, large scale iron-sodium energy storage system will be manufactured in the US, helping to support more wind and solar in the grid.

The sodium-ion battery module has self-recovery from failure, real-time battery cell equalization function, and provides protection functions such as overvoltage, undervoltage, overcurrent, short-circuit, and ...

OPzV batteries are optimized for renewable energy storage and grid management. Deployed in solar + storage hybrid projects, reducing energy waste and improving ROI.

These new solutions offer significantly increased capacity within the same volume and footprint, making them highly integrated and suitable for large-scale, commercial, and industrial ...

Under the terms of the phased agreement, Peak Energy will supply up to 4.75 GWh of its sodium-ion battery energy storage systems (ESS). These systems are slated for deployment across...

Scalable from Kw to multi-MW, the BlueRack(TM) 250 battery cabinet is a safe, high-powered solution you can count on. By employing breakthrough sodium-ion cells based on Prussian blue electrodes, the ...

Our customizable floor-standing cabinet solution is engineered to meet modern energy challenges with long lifespan, outstanding cold resistance, and a competitive sodium ion battery price that makes ...

Ultra-large battery sodium-ion energy storage cabinet

Recently, EVE Energy's first large-capacity sodium-ion battery energy storage system was successfully connected to the grid and commissioned at its Jingmen base, officially entering the ...
