Could new mini nuclear reactors be built on decommissioned nuclear power stations?

The first generation of new mini nuclear reactors planned by the government could be built on the sites of previous decommissioned nuclear power stations, a leading expert has said. The stations include 12 of the earliest nuclear sites in the UK, some of which date back to the 1960s and were much smaller than later nuclear power stations.

Are small modular reactors the future of nuclear energy?

Small Modular Reactors offer a significant step forward in nuclear technology, providing a path to cleaner energy for a wide range of applications. There are still some hurdles to clear before SMRs are widely implemented. The industry is hard at work on ensuring cost-competitiveness, clarifying regulatory pathways and improving waste management.
